

# Naloxone in the Home

## **What is naloxone?**

Also known by the brand name Narcan, naloxone is a medicated nasal spray that quickly reverses the effect of opioid drugs in the event of a bad reaction or overdose.

## **Why do I need naloxone in my home?**

If you have a prescription for an opioid medication in your house, it is a good idea to have naloxone on hand as a safety measure. Naloxone can be administered to anyone experiencing an overdose or poisoning by opioids, including young children and infants.

## **How safe is naloxone?**

Naloxone is very safe. If taken accidentally by someone who has not taken an opioid drug, it has no effect.

## **How do I obtain naloxone?**

Ask your health care provider to prescribe naloxone when you get an opioid prescription. You can also obtain naloxone directly from participating pharmacists in Lake County.
